"Caring Interventions," our compilation of therapeutic interventions which we offer in imminent death care, suggests specific ways family and friends can effectively create an enriching environment for their loved one in the dying process.

We explain how adjusting the surroundings in the dying person's environment, being aware of their sensitivities, offering meaningful activities and family time, may all help create a sacred place and more soothing atmosphere.

These items can be purchased through our online, secure, product pages. [CLICK HERE TO ORDER!](#)

Support at the end of life...

Years ago, before hospitals became "the place to die," family and friends stood vigil, providing support and saying good-bye. We desire to resurrect this tradition by providing specific interventions in the final hours of life.

Our hope is that families on our service will better understand how our interventions can help the physical, emotional, and spiritual needs of a dying person. Our imminent death interventions include:

->Information about the dying process; ->Our "Caring Interventions" guidelines; ->Therapeutic music; ->Atmosphere Enhancement; ->Religious Support; ->Family Support; ->Funeral arrangements

This service is available in the North Texas area only. These services are available for a reasonable per hour fee.
